

HYDROCROM ALL-IN-ONE

XGCF06B COLOR

Water-Based Stained Matt Self-Sealers for Exteriors

First the impregnator, then the sealer and finally the top-coat ... or All-in-One! Great news for exterior wood: today total protection is ensured with a single product, available in four standard colors or custom colors. It can be applied by brush or spray, for new applications or renewals, for windows, shutters, or outdoor furniture ... And the only thing that will take time will be choosing the color!

DESCRIPTION AND MAIN FEATURES

Hydrocrom All-in-One is the new series of water-based self-sealers for exteriors. It is designed to replace with one single product not only the sealer and the top-coat, but also the impregnator. Thanks to a special formulation that enables one product to produce the technical and functional characteristics of a complete coating cycle for exteriors, ensuring total protection outside.

In formulating these innovative products, the watchword was maximum flexibility, starting with colors. The All-in-One self sealers are available in four price list colors selected from those most used on the market (XGCF616 Color Series, 10 sheen), accompanied by a clear version series of three sheen levels (XGCF06B Series Gloss, 10, 25, 80 sheen) to be used in combination with pigmented pastes HMT3 Color Series to get all the desired stained colors.

In addition, the All-in-One products are applied by brush or spray, both for new applications and renewals.
