

*Beyond The Surface*

## **Information from Pro Wood**

### *Varicure Precat Lacquer*

This product is designed to be used without thinning, although it can be thinned. Try spraying first right out of the container for best results.

Do not use steel wool to sand between coats.

When looking for increased durability, add 3% catalyst (product 837-0870).

Always spray acid catalyzed coatings in an environment of 60°F or above.
