

Beyond The Surface

3M Information Sheet

- Economical liquid compound delivers a high rate of cut
- Compound removes 1000 and finer sand scratches
- Removes oxidation
- Formula remains wet for a long time and continues to cut with medium pressure
- Compound may be applied by hand or machine

3M™ Super Duty Rubbing Compound is an aggressive compound that removes 1000 and finer sand scratches on all types of paint surfaces and gelcoats. Our compound remains wet on the job with little or no mess, maintains high rate of cut with constant pressure and buffs to high gloss with minimum effort. It can be used by hand or machine.

Compound removes 1000 and finer sand scratches

Aggressive Cut Quickly Eliminates Imperfections

3M™ Super Duty Rubbing Compound aggressively eliminates scratches and oxidation. The compound stays wet longer so there is enough time to remove imperfections. The heavy cut compound smooths out blemishes and produces a lustrous appearance with minimal effort. Our Super Duty Rubbing Compound works on all types of automotive paint and gelcoat.
