

De-Curl

Problem

Curly edgebanding

Solution

Easy to straighten

Feature

Fits edgebanding up to 1½" wide

Fastedge comes on a roll and the natural curl or memory should be removed. The new De-Curl quickly removes the curl out of the edgebanding. It is small, light weight, and easy to use. Simply pull the banding through the slot at a slight angle and your edgebanding will lay flat, making it easier to install. Designed by a cabinet maker. Another great example of stopping the struggle.

Features...

- Straighten edgebanding
- Ergonomic design

Great for...

- Cabinetmakers
- Carpenters
