Product Data Sheet

PlaneStick Burn-In Stick

M350-Series

All colors

Product Description: The PlaneStick burn-in stick is a low sheen, conventional burn-in stick that is resilient and resists chipping or breaking, especially on edges and corners. This is the perfect burn-in choice when working on lower sheens and especially corner and edge repairs.

Advantages:

1. "Flat" sheen, no gloss up when top coated
2. Hard but not brittle, will never shatter
3. Fast and easy to level
4. Great for hardwood floors
5. Excellent for plastic laminates

Characteristics:

Appearance: Colored Solid

Non-Volatile (wt): 100%

Melt Range: 220°F -280°F

Cooling time: Air cooled @ 72F, 35% RH

To touch (normal repairs): 3 minutes

To touch (deeper repairs): 5 minutes

Volatile Organic Compounds (VOC): N/A

Package life: 3 years

Sheen: Flat

All values theoretical; not intended to be exact QC specifications.

HMS: Health – 2, Flammability – 0, Reactivity – 0, Personal Protection - X

Directions: Prepare the damaged area by removing loose wood fibers, splinters and other contaminants. Damage area must be dry and free of oil and wax. Choose the PlaneStick Burn-In Stick that closely matches the background color of the finish. Using a hot burn-in knife melt enough PlaneStick onto the knife blade to slightly overfill the damaged area or to allow the material to flow into the void. Flow the material into the damaged area. Do not hold the hot blade in the fresh fill to prevent bubbling and air entrapment. Allow the fill to cool until it begins to dull in sheen. Coat a finger with Mohawk Wool-Lube and press on the filled area to assure distribution of the filler into the entire damage. Level the filler using conventional burn-in methods.

Safety and Other Precautions: Read MSDS for precautions before using product.
